

Dear TPO,

SAG Infotech offers training proposals for students who are pursuing their degree and for those who have completed. It will be a very good opportunity for them to get experience on live projects. They will get to know a lot about the working processes and procedures of work under our company and its professionals and we will be very much happy to offer them opportunity for their future and success.

## Training Proposal

SAG IPL Company running in the market from 12 years with esteemed professional team. We at SAG IPL have designed various career oriented professional training programs to build their career in IT Industry. This course is for B.E, B.TECH, MCA, and M-SC (IT) to bridge the gap and provide a platform to polish the skills of a student for their professional career.

As per current market scenario availability of trained & skilled people are very low and every company needs skilled people. So after considering the current market scenario we have designed a Training Program (SIEEP), which provides practical training of latest technology. In this course the company will give the Live Projects to the Students and project will be monitored by the Senior Developers. So candidate will be familiar with the Development logic & environment, practical problem faced during development.

Through our proposal, we would like to invite the students in various training programs offered by us. It would prove to be an excellent opportunity for the students who want to begin their career as successful IT engineers.

The wide gap experienced between academic education and industry requirements often acts as an obstacle for aspirants wishing to build their career in the IT industry. SAG Infotech has designed various career oriented programs for engineers to bridge the gap and provide a platform to polish technical skills of a student. It will help to build a pool of quality people who can be recruited to top organizations in industry.

Also, it would enable the students to better equip themselves to fulfill the demands of the industry. The company is proud of its strong and talented developer team with a diverse range of skill set that extends over **.NET, PHP, Cloud, Android, I-Phone, SEO, PPC**, and C/C++ platforms to deliver required products. As it is well known that, SAG Infotech offers an array of services including product development, QA (manual testing and automation), mobile applications development and custom software development that helps create business value for its clients. And, an area of expertise developed by SAG Infotech is that of search engine optimization (SEO) which has proved to be a business value stimulator while developing web applications. Complementing the strong development skills is the much required domain knowledge spanning across various sectors like Auto, Insurance, Finance, ecommerce, Healthcare, Telecom and many more. So, we can say that there is a lot of scope for the young talents to prove themselves and make an impact in the industry.

As a special initiative, SAG Infotech has designed various summer training programs which will enhance the technical skills of the students and give them industrial exposure for better future prospects. These courses will be conducted by our well experienced trainers mentored by executives of SAG Infotech Soft and they would like to share their vast experience throughout the training. The concept of these programs is totally project oriented and dedicated to everyone from any stream. It will also help those who want to grab the quality education in short span of time. In this training, students will learn thorough concepts with the help of industrial exposure, hands on implementation on various tools and utilities, case studies, presentations etc.

### Courses Offered
